9	Homepage decoration	Both	Completed
10	Experience filter	Dakota	Completed
11	Autocomplete search bar	Zach	Completed
12	Experience slider	Dakota	Completed
13	Job buttons styling	Zach	Completed

Challenges and Solutions:

Challenge: Structuring relational tables

Solution: Created normalized tables with foreign keys

Challenge: Autocomplete accuracy

Solution: Added partial matching + debounce

Challenge: Filter state sync issues

Solution: Rebuilt React state logic with `useEffect` dependencies

Challenge: Inconsistent card styling

Solution: Created reusable components and grid layout
